

*Jl. of Research in VLSI Design & Tech.*

## Table of Contents

Sr. No.	Contents	Pages
1.	Optimizing Power Efficiency and ASIC Implementation of a Fuzzy Logic-based Automatic Car Parking System Using Low Power VLSI Architecture  <i>Vikash Kumar, Rishik Jaiswal, Prakriti Singh</i>	1-14
2.	Exploring VLSI Test Scan Architectures a Comprehensive Review  Abhinav	15-18
3.	Enhancing Wireless Sensor Network Performance with Mixed-Signal Based VLSI Technology  <i>Shivay Malohtra, Ramesh Kumar, Aakash Gehlot</i>	19-25
4.	Revolutionizing AI the Integration of VLSI Technology  <i>Atul Negi, Praveen Kumar, Alok Pandit</i>	26-32
5.	Effective Teaching of VLSI Design Using a Small Budget, Project-Based Approach  <i>Rudraksh Negi</i>	33-40

## Table of Contents

Sr. No.	Contents	Pages
1.	I2C Master Bus Controller Architecture on FPGA  <i>Sushma P S, Arundathi Manoj</i>	41-49
2.	Architecting the Future Innovations in VLSI Design for Advanced Electronics  <i>Raghuvash Mehra</i>	50-57
3.	Exploring the Evolution and Impact of VLSI Design Tools and Technology a Comprehensive Research Study  <i>Dr. S. B. Kemdarne, Viren Garg</i>	58-68
4.	Small Scale, Big Impact the Power of VLSI Design in Modern Technology  <i>Atul Ramdas Chandanvadan, Kunal Deshmukh</i>	69-77
5.	3D Integration and Advanced Packaging Techniques for VLSI Circuits  <i>Rohini Sharma, Gayatri Thakare</i>	78-90
